

Dear

In this e-mail you will find

Product of the month: Vapor Quality. We made 3 new Vapor Quality videos, going into detail about this innovative sensor technology. The videos are presented by Michael Elstrøm and Henrik Kudsk.

A case story about Vapor Quality as compressor protection

A Highlight: Defrost HBDF winning Best Innovation In Refrigeration.

A Christmas Greeting

Soon to come: Product/installations videos.
Expected to be published in Q1 2023.

PRODUCT OF THE MONTH - VAPOR QUALITY CONTROL

In this video, our Product Manager Henrik Kudsk will explain the design and basic functions of the Vapor Quality sensor types: the rod style, and Strainerhouse

In this video, Henrik Kudsk will explain how Vapor Quality Strainer house works on a DX Ammonia system, and what benefits can be achieved in the process.

In this Vapor Quality video, Micheal Elstrøm will demonstrate The Duke, with the Inline and Strainer house Vapor Quality sensor types - and the new Flow Sensor, as part of the demonstration.

VAPOR QUALITY AS COMPRESSOR PROTECTION

Last month we visited one of our customers Ammongas, delivering the control system for a Biogas plant near Haderslev in Denmark. They have used Vapor Quality sensors with success for the past 2 years and eliminated compressor damages. The problem is water coming from the fermentation entering the compressor and causing damage in the lubrication system.

Read case story and learn about Biogas and the benefits of using Vapor Quality as compressor protection in a hazardous ATEX environment.
