

25 years of experience

With over 25 years of experience, HB Products is at the forefront of developing and producing sensors for industrial and commercial refrigeration and heat-pump systems. Based in Aarhus, Denmark, we continuously push the technology to ensure better, more efficient, and durable products for the future.

With distributors in more than 60 countries, we can ensure technical expertise and optimal solutions worldwide for energy-efficient evaporator control, level control, and oil management.

However, our strong global presence never compromises the close collaboration we are dedicated to maintain with our customers.

We are dedicated to supplying switches and sensors for industrial applications. We focus on refrigeration, but our sensors can be used in other industrial applications where robust and reliable sensors are called for. Our sensors are developed and manufactured in Denmark. We mainly use local sourced parts to increase flexibility and reduce lead times. All sensors and switches comply with EU directives and have earned the CE marking.

Ammonia Plant Principle

Educational design of an ammonia plant with a selection of sensors and switches from HB Products.

Level Sensors

Ejector

Level Switches

Vapor Quality Sensors

Defrost Sensor

Sensors for leakage detection
